

Whitecross Nursery School Admissions Policy

Reviewed by	Claire FitzPatrick
Date of last review	It is a new policy
Date of next review	June 2027
Ratified by the Governing Body	July 2026

This policy will be reviewed sooner if there is a change to legislation or guidance that may affect it. Any changes will be communicated to all stakeholders.

Contents

 - a. Appendix 1: approved use of AI tools (table)

1. Aims and scope

Here at Whitecross Nursery School we understand the valuable potential that artificial intelligence (AI), including generative AI, holds for schools. For example, it can be used to enhance pedagogical methods, customise learning experiences and progress educational innovation.

We are also aware of the risks posed by AI, including data protection breaches, copyright issues, ethical complications, safeguarding and compliance with wider legal obligations.

Therefore, the aim of this policy is to establish guidelines for the ethical, secure and responsible use of AI technologies across our whole school community.

This policy covers the use of AI tools by school staff, governors and children. This includes generative chatbots such as Copilot, ChatGPT and Google Gemini (please note, this list is not exhaustive).

This policy aims to:

- Support the use of AI to enhance teaching and learning
- Support staff to explore AI solutions to improve efficiency and reduce workload
- Prepare staff, governors and children for a future in which AI technology will be an integral part
- Promote equity in education by using AI to address learning gaps and provide personalised support
- Ensure that AI technologies are used ethically and responsibly by all staff, governors and children, including in compliance with intellectual property law
- Protect the privacy and personal data of staff, governors and children in compliance with the UK GDPR

2. Legislation and guidance

This policy reflects good practice guidelines / recommendations in the following publications:

- [Generative artificial intelligence \(AI\) in education](#), published by the Department for Education (DfE)
- [Generative AI: product safety standards](#), published by the DfE
- [How Ofsted looks at AI during inspection and regulation](#), published by Ofsted
- [AI use in assessments](#), published by the Joint Council for Qualifications

This policy also meets the requirements of the:

- UK General Data Protection Regulation (UK GDPR) – the EU GDPR was incorporated into UK legislation, with some amendments, by [The Data Protection, Privacy and Electronic Communications \(Amendments etc\) \(EU Exit\) Regulations 2020](#)
- [Data Protection Act 2018 \(DPA 2018\)](#)

3. Roles and responsibilities

AI lead

Our generative AI lead is the Headteacher. They are responsible for the day-to-day leadership, ownership and management of AI use in the school.

Governing board

The governing board will:

- Take overall responsibility for monitoring this policy and holding the Headteacher to account for its implementation in line with the school's AI strategy
- Ensure the Headteacher is appropriately supported to make informed decisions regarding the effective and ethical use of AI in the school

Governors will adhere to the guidelines below to protect data when using generative AI tools themselves:

- Use only approved AI tools (see section 5 and appendix 1)

- Seek advice from the data protection officer (DPO), AI lead and the designated safeguarding lead, as appropriate
- Ensure there is no identifiable information included in what they put into generative AI tools (unless strictly necessary and they have been approved to do so – check with your DPO/AI lead where appropriate)
- Acknowledge or reference any use of generative AI in their work
- Fact-check results to make sure the information is accurate

Headteacher

The Headteacher will:

- Take responsibility for the day-to-day leadership and management of AI use in the school
- Liaise with the data protection officer (DPO) to ensure that the use of AI in the school is in accordance with data protection legislation
- Liaise with the designated safeguarding lead (DSL) to ensure that the use of AI is in accordance with Keeping Children Safe in Education (KCSIE), and the school's child protection and safeguarding policy
- Ensure that the guidance set out in this policy is followed by all staff
- Review and update this AI policy annually or earlier if there are any adaption, recommendations or new information to consider.
- Inform parents and carers around responsibility about AI use
- Ensure staff are appropriately trained in the effective use and potential risks of AI
- Sign off on approved uses of AI, or new AI tools, taking into account advice from the DPO and data protection impact assessments

Data protection officer (DPO)

The data protection officer (DPO) is responsible for monitoring and advising on our compliance with data protection law, including in relation to the use of AI.

Designated safeguarding lead (DSL)

The DSL is responsible for monitoring and advising on our compliance with safeguarding requirements including in relation to the use of AI, such as:

- Being aware of new and emerging safeguarding threats posed by AI
- Updating and delivering staff training on AI safeguarding threats
- Responding to safeguarding incidents in line with KCSIE and the school's child protection and safeguarding policy
- Understanding the filtering and monitoring systems and processes in place on school devices

All staff

As part of our aim to reduce staff workload while improving outcomes for our children, we encourage staff to explore opportunities to meet these objectives through the use of approved AI tools. Any use of AI must follow the guidelines set out in this policy.

To protect data when using generative AI tools, staff must:

- Use only approved AI tools (see section 5 and appendix 1)
- Seek advice from the DSL, AI Lead and DPO as appropriate
- Report safeguarding concerns to the DSL in line with our school's child protection and safeguarding policy
- Staff to report any GDPR breaches when using AI
- Ensure there is no identifiable information included in what they put into generative AI tools (unless it is strictly necessary and they are approved to do so – they should check with the DPO/AI lead where appropriate)
- Acknowledge or reference the use of generative AI in their work
- Fact-check results to make sure the information is accurate

Children

Our children are too young to understand what AI is or how to use it in school. But we will share out any safeguarding information regarding AI with parents and carers.

4. Process for approving AI use

The Headteacher is responsible for signing off on approved uses of AI, or new AI tools, taking into account advice from the DPO.

Any use of generative AI by staff and children will be risk assessed, which will include plans for mitigating against unauthorised use cases. The intended use case will be specified and have clear benefits that outweigh the risks.

As part of this process, we will seek assurances from suppliers of AI tools about how their products meet the DfE's [AI product safety standards](#).

If it is strictly necessary to use an AI tool to process personal data, we will carry out a data protection impact assessment (DPIA) in addition to the risk assessment. The DPO will advise on this. If the use case is approved, we will also update our privacy notices accordingly.

In the case of AI tools intended for use by children, the risk assessment process must consider:

- Age restrictions set by AI tools
- Statutory requirements of [KCSIE](#) and our child protection and safeguarding policy
- [Filtering and monitoring standards](#) to make sure we have the appropriate systems in place to protect children from harm
- The DfE's [AI product safety standards](#)

5. Staff and governors' use of AI

Approved use of AI

We are committed to helping staff and governors reduce their workload. Generative AI tools can make certain written tasks quicker and easier to complete, but cannot replace the judgement and knowledge of a human expert. Technology, including generative AI, should not replace the valuable relationship between teachers and children.

Any content produced using AI requires critical judgement to check for appropriateness and accuracy. Whatever tools or resources are used to produce plans, policies or documents, the quality and content of the final document remains the professional responsibility of the person who produced it.

Any plans, policies or documents created using AI should be clearly attributed. Any member of staff or governor using an AI-generated plan, policy or document should only share the AI-generated content with other members of staff or governors for use if they are confident of the accuracy of the information, as the content remains the professional responsibility of the person who produced it.

Always consider whether AI is the right tool to use. Just because the school has approved its use doesn't mean it will always be appropriate.

Staff are welcome to suggest new ways of using AI to improve child outcomes and reduce workload. They should contact the Headteacher to discuss any ideas they may have with regards to using AI, so they – in consultation with others, as appropriate – can assess whether they deem it to be a satisfactory new method of working.

Data protection and privacy

To ensure that personal and sensitive data remains secure, no one will be permitted to enter such data into generative AI tools or chatbots that have not been approved as safe for this use case.

If personal and/or sensitive data is entered into an unauthorised generative AI tool, Whitecross Nursery School will treat this as a data breach and will follow the personal data breach procedure outlined in our data protection policy. Please also refer to section 11 of this policy.

Intellectual property

Most generative AI tools use inputs submitted by users to train and refine their models.

Materials created by teachers may be copyright material. Examples of what may be deemed original creative work include:

- Lesson plans created by a teacher
- Prompts entered into generative AI tools

We will not allow or cause intellectual property, including children's work, to be used to train generative AI models without appropriate consent or exemption to copyright.

We are aware that secondary infringement could happen if AI products are trained on unlicensed material and outputs and then used in schools or published more widely, such as on the school's website. This may include:

- Publishing a policy that has been created by an AI tool that used input taken from another school's policy without that school's permission
- Using an image on a website that has been created by an AI tool using input taken from the copyright holder without their permission

Exemptions to copyright are limited – we will seek legal advice if we are unsure as to whether we are acting within the law.

Bias

We are aware that AI tools can perpetuate existing biases, particularly towards protected characteristics including sex, race and disability. For this reason, critical thought must be applied to all outputs of authorised AI applications. This means fact and sense-checking the output.

We will ensure we can identify and rectify bias or error by training staff in this area.

We also regularly review our use of AI to identify and correct any biases that may arise.

If parents/carers or children have any concerns or complaints about potential unfair treatment or other negative outcomes as a consequence of AI use, these will be dealt with through our usual complaints procedure.

Raising concerns

We encourage staff and governors to speak to the Headteacher in the first instance if they have any concerns about a proposed use of AI, or the use of AI that may have resulted in errors that led to adverse consequences or unfair treatment.

Safeguarding concerns arising from the use of generative AI must be reported immediately to the DSL in accordance with our school's child protection and safeguarding policy.

Ethical and responsible use

We will always:

- Use generative AI tools ethically and responsibly
- Remember the principles set out in our school's equality policy when using generative AI tools
- Consider whether the tool has real-time internet access, or access to information up to a certain point in time, as this may impact the accuracy of the output
- Fact and sense-check the output before relying on it

Staff and governors must not:

- Generate content to impersonate, bully or harass another person
- Generate explicit or offensive content
- Input offensive, discriminatory or inappropriate content as a prompt

6. Educating children about AI

Here at Whitecross Nursery School, we acknowledge that children benefit from a knowledge-rich curriculum that allows them to become well-informed users of technology and understand its impact on society in an age appropriate way. Strong foundational knowledge will ensure that children develop the right skills to make the best use of generative AI.

Children do not have access in school to any AI tools but may at home be exposed to the effects of AI. Therefore we seek to educate our parents and carers about the safe use of AI through newsletters, parent meetings and by sharing any new legal information with them. We will discuss:

- How to create and use digital content safely and responsibly
- The limitations, reliability and potential bias of generative AI
- How information on the internet is organised and ranked

- Online safety to protect against harmful or misleading content

9. Staff training

Here at Whitecross nursery School teaching staff and TA's currently do not use AI within nursery as we teach skills practically. We limit screen time as under-fives should have no more than an hour of screen use per day and we are aware that our parents and carers provide that hour for the children.

Resources in our school are books and toys rather than AI created documents, however in the future teachers when planning may create a resource for children to use using AI such as a map or a letter to be read to them.

- All staff will be aware of and have read this policy.
- Any training, new information will be shared with all staff
- All staff should have a good understanding before using it
- Staff should work with other staff on the first few times of using it to ensure they have peer support and a strong understanding of what they can and cannot do.
- Any IT training will be shared with everyone

10. Referral to our child protection and safeguarding policy

The school is aware that the use of generative AI may in some circumstances lead to safeguarding concerns including, but not limited to:

- Sexual grooming
- Sexual harassment
- Sexual extortion
- Child sexual abuse/exploitation material
- Harmful content
- Harmful advertisements and promotions
- Bullying

Where there are safeguarding concerns arising from the use of generative AI, a report must be made to the DSL immediately.

Any such incident will be dealt with according to the procedures set out in the school's child protection and safeguarding policy, and child protection referral process.

11. Breach of this policy

By staff

Breach of this policy by staff will be dealt with in line with our staff code of conduct.

Where disciplinary action is appropriate, it may be taken whether the breach occurs:

- During or outside of working hours
- On an individual's own device or a school device

- At home, at school or from a remote working location

Staff members will be required to co-operate with any investigation into a suspected breach of this policy. This may involve providing us with access to:

- The generative AI application in question (whether or not it is one authorised by the school)
- Any relevant passwords or login details

You must report any breach of this policy, either by you or by another member of staff, to the Headteacher immediately.

By governors

Governors found in breach of this policy will be dealt with by the chair of governors and may result in a governor being asked to step down from their position at this school

12. Monitoring and transparency

AI technology, and the benefits, risks and harms related to it, evolve and change rapidly. Consequently, this policy is a live document that must be kept updated by whenever there is a significant change to either AI use by the school or the associated risks of AI usage.

This policy will also be regularly reviewed and updated to align with emerging best practices, technological advancements and changes in regulations.

The policy will be shared with the full governing board at least annually.

All teaching staff are expected to read and follow this policy and sign to say read and understood.

The Headteacher and SBM together will monitor the effectiveness of AI usage across the school.

We will ensure we keep members of the school community up to date on the use of AI technologies for educational purposes. As part of our regular surveys, feedback from parents/carers and staff will be considered in the ongoing evaluation and development of AI use in school.

13. Links with other policies

This AI policy is linked to our:

- Data protection policy
- Safeguarding/child protection policy
- Behaviour policy
- The staff code of conduct

a. Appendix 1:

Approved use of AI tools (table)

APPROVED AI TOOLS	APPROVED FOR	APPROVED USES
Co-pilot	• Teachers • Governors • Office staff	• Letter to parents/carers • Job descriptions and adverts • Interview questions

APPROVED AI TOOLS	APPROVED FOR	APPROVED USES
Co-pilot	• Teachers	• Creating lesson resources • Governing Body Documents • Analysis of anonymised data
